Today you are going to decorate your own paper plate. You can use crayons, felttips, glue, glitter, cut out pieces of coloured paper. See images below to see examples of different plate decorations.	Children to use pegs to transfer small sized items from one pot/container to another. Children to move materials from left to right then right to left. Change the position of container and sizes of materials within. You could add additional challenges using a timer or seeing how many pieces children can transfer in one minute. This will help strengthen fine motor skills, helping children to strengthen their finger muscles. Practise squeezing the pegs together a number of times.	Children to choose their favourite book and read with their parents/carers.
