## Length and Height

This week we will be looking at measuring length and height. We will look at using non-standard measures building onto standard measurements.

Today I would like you to go on an investigation and measure items around your house.

I want you to use hand spans and your feet to measure the following items, and then any item of your choice.

Item	Non-standard measurement	Measurement
Cereal box	Hand spans	
Height of sofa	Hand spans	
Length of living room	Feet
