

Time and Challenge

Usain Bolt can run 100 m in 9.58 seconds (just under 10 seconds).

Today you are going to compete with a family member to see who can do the most of each activity with ten seconds.

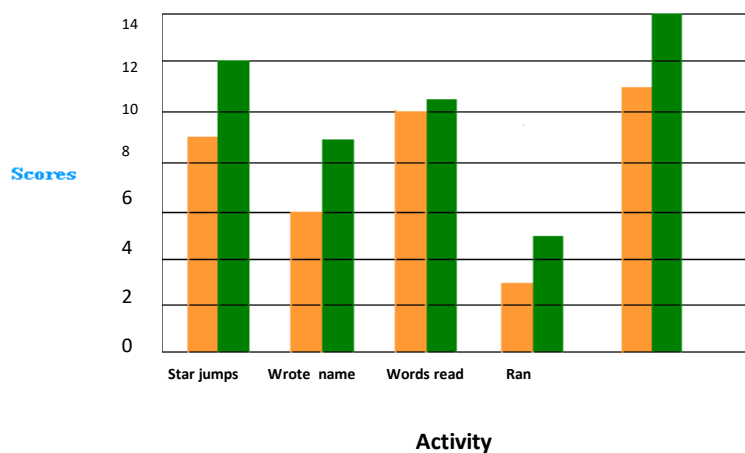

How many times can you...(in 10 seconds)

Activity	You	Family Member
Star jumps		
Write your name		
Words can you read from a book		
Run across the room		
Choose your own last activity		

Task:

Now use the data you have gathered to put the information into a bar graph. Remember to use a colour key for you and your family members.

Example

Once you have created your bar chart answer the following questions.

1. Who many words did you and your partner read in total?
2. Add together all your scores and compare them to your partners scores. What is the difference between your scores?
3. Which activity did you enjoy the most and why?
4. Which activity did you manage the least of and why?

Challenge:

Estimate what your score would be for each activity if you had 20 seconds to complete each task, then time yourself to see if your estimations were correct.

Activity	Estimate score	Actual score
Star jumps		
Write your name		
Words read		
Run across room		
Choose activity
