

Topic, Science and Spanish Activities

Week Beginning 18th May 2020

Flow

We are going to stick with Flow this week. We have looked at different features of a river. These are the key ones that we have learnt: **Ox Bow Lake**, **Meander**, **River source**, **Tributary**, **Mouth** and **floodplain**. Can you remember anymore? Your task is to draw your own river diagram and label the features. To challenge yourself further, describe what each feature is.

Science- Plants

What do plants need?

Using what you have learnt about the adaptations of plants (differences in plants to help them to grow).

Your task is to create a small fact file all about a plant of your choice. You could focus on

Cacti for example. Where do they grow? What do they need to grow and why? Any fascinating facts?

Spanish

Do you remember to names of animals? Can you match the correct name to the animal and practise saying these aloud?

You can practise these at home with a member of your family?

Don't forget- you can get help with your work or send pictures of what you have been doing by emailing wdv.year3@oasiswoodview.org
