

Topic and Science Activities

Week Beginning 8th June 2020

Gods and Mortals

Do you remember all of the Gods that we have looked at this year? What are they known for? How did they look? For example: Hera. Hera was the goddess of women and marriage. She is also known for being Zeus' wife.

Can you design your own god or goddess? Draw them and label them describing what they look like and why they are important. What do they symbolise? The more detail the better.

Science- Movement and feeding

For science this week, we are going to look at our muscles. We have learnt why muscles were important this year. Your task this week is to find out why we need muscles. Once you have done this, you will need to test the endurance of your own muscles. We did this right at the beginning of the year. This time you may want to compete with someone in your household!

Remember to follow the instructions below. Who will last the longest? Once you have conducted the experiment, what can you conclude? What does this mean about your muscles?

Tired Muscles

Science Experiment

Method

1. Put your arm in the air.
2. Start the timer.
3. Make a fist with the hand that's in the air, then release it. Repeat until you cannot do it any longer.
4. Put your arm down and stop the timer.

You will need:
Timer

Don't forget- you can get help with your work or send pictures of what you have been doing by emailing wdv.year3@oasiswoodview.org
