

Tuesday 28th April

L.K: To create your own mythical creature

Today you will be creating your very own mythical creature! We have already had some practice this year at creating dragons and other monsters in class and this lesson will follow a lot of the same format. You will need to create a creature using the following bullet-points. Make sure that you have included information for everything here so that we can use today's work later in the week!

You must include the following:

- Your creature's name
- Your creature's habitat and why they live there
- What your creature eats and why
- How your creature grows from a baby to an adult (what does it look like at each of these stages?)
- What secret abilities or hidden skills does your creature have? Can it turn invisible? Spit lava?
- Why are your creature's hidden abilities useful?

Then, when you have finished, you can create a picture of your mythical creature and annotate it with your information. Make this as colourful and engaging as you can, as you will want lots of people to learn about your monster!
