

Week beginning: 18th May

L.K: Digestion

We learnt about digestion in January and found that there are many parts to the digestive system. From the mouth, teeth and saliva, to the stomach, small intestine and large intestine- a lot of effort goes into breaking down our food!

Your task is to research a part of the digestive system in humans and produce a poster on it either on A4 paper, in your book, on the computer or any other creative way you can think of. You can make it as engaging and interactive as you want to- so use your imagination! Make sure to include lots of scientific information and to check your SPAG whilst completing your work.

Good luck and I hope to see lots of your work at WDV.Year4@oasiswoodview.org.

Mr Crowe
