

## Wednesday 17<sup>th</sup> June

### L.K: To create our own poems using rhyming couplets

Rhyming couplets are a method of poem writing that involves the last word in a group of two sentences rhyming with each other. For example:

*My favourite pet is a **rat**.*

*His name is Carl and he's ever so **fat**.*

*He broke out one **day**.*

*I thought he'd always **stay**.*

*Then I found him, eating **cake**.*

*With my other rat, **Jake**.*

As you can see, the last word in each sentence pair rhyme with each other. This is a crucial part of writing rhyming couplets and you must do this to complete the task properly!

### Your task:

Write a poem using rhyming couplets about anything you wish. It would be a good idea to create a mind map before you start so that you have lots of readily available ideas to use when you come to writing.
