LK: To convert 24-hour times to 12-hour times

Hello everybody! Miss Dattani here, I hope you are all safe and well.

Your task is differentiated two ways:

-Section A is suited for one star (blue and green)

-Section B is suited for two and three star (yellow, orange and red table)

The 24 hour clock always has 4 digits

hours

minutes

If it is a morning time, there will be a zero as the first digit on the clock

- You know it is the morning if the hours are less than 12
- To convert afternoon times to 12-hour time, simply subtract 12 from the hours

For example:

22:00 would be worked out by doing: $22 - 12 = 10$ so it is 10pm

Use this method for the following questions

Section A- turn these 24-hour times into 12-hour times

13:00

15:00

16:30

19:30

20:00

21:00

23:00

17:15

Section B- turn these 24-hour times into 12-hour times

13:15

14:20

20:20

21:22

22:45

23:48

15:55

16:25
