LK: To add decimals

Section A is suitable for blue and green table

Section B is suitable for yellow, orange and red table

Today we will look at the addition of decimals. We use the exact same method for addition with whole numbers, regrouping any digits once a group of 10 has been reached. An example of $1.2+1.9$ is below. Remember, the decimal point DOES NOT MOVE.

Thousands	Hundreds	Tens	Ones	Tenths	Hundredths	Thousandths
			1	2		
			+	1	9	
			3	1		

For every question, draw a place value chart. Set your work out like the example above.

Section A	Section B
$1.1+1.4=$	$1.6+1.5=$
$1.6+1.2=$	$1.8+1.6=$
$2.3+2.5=$	$1.12+1.41=$
$2.9+1.1=$	$1.15+1.43=$
$2.8+1.4=$	$2.12+5.18=$
$2.9+1.7=$	$5.13+6.19=$

$3.5+0.3=$

$3.6+3.7=$

$13.42+16.98=$

$18.99+0.99=$
