LK: To apply known multiplication and division facts

Hello everybody! Miss Dattani here, I hope you are all safe and well.

Your task is differentiated two ways:

-Section A is suited for one star (blue and green)

-Section B is suited for two and three star (yellow, orange and red table)

Today, you will practise your multiplication and division when finding missing numbers. An example is below.

$$\square \times 3 = 18$$

If you have forgotten what number you multiply by 3 to get 18, you could use the inverse to find the answer. $18 \div 3 = 6$ so $6 \times 3 = 18$.

Section A

- $\square \times 9 = 81$
- $\square \times 12 = 84$
- $\square \div 6 = 12$
- $\square \div 3 = 9$
- $\square \times 7 = 42$
- $\square \times 11 = 132$
- $\square \div 9 = 8$
- $\square \div 12 = 12$
- $\square \times 8 = 56$
- $\square \times 4 = 24$
- $\square \div 11 = 11$
- $\square \div 7 = 8$

Section B

- $\square \times 11 = 1320$
- $\square \times 3 = 180$
- $\square \div 8 = 90$
- $\square \div 6 = 80$
- $\square \times 12 = 1440$
- $\square \times 7 = 490$
- $\square \div 5 = 70$
- $\square \div 11 = 110$
- $\square \times 9 = 540$
- $\square \times 6 = 420$
- $\square \div 7 = 120$
- $\square \div 12 = 80$
