

Friday 19th June

Equipment

Today we are going to find out about the items you might need to use during your lessons at secondary school. You will need to take your own equipment each day, which you may carry round with you or store in your locker until needed.

It is tempting to want lots of new items, but often you don't need as much as you might think, and you may already have some of them.

Which of the items above do you already have ready for your new school and which might you need to buy? What other items might you need? (Don't worry about uniform, we will look at this on Monday).

Task

We would like you to look at your school website, or any information you have been sent, to find out what you will need. Then you will create a page that shows what you already have and what you will need to buy. You could draw your list to make it easier to remember, or even cut pictures from any magazines you might have!

You might want to think about what type of item you want also. For example, backpacks need to be able to carry a lot and be comfortable, so wide padded straps can be helpful.
